Cool Techies: Your Source for Ultimate Comfort and Healthy Air?

Our ultimate goal is to provide you with the ideal combination of optimal airflow and exceptional air quality in your Houston or Katy area home. We go beyond simply installing new equipment. We measure your entire comfort system's performance and show you how to get the most out of your central heating and air conditioning. Did you know that newly installed equipment often operates at a fraction of its rated capacity? At Cool Techies, we want to change that! We strive to deliver the highest possible HVAC system performance for your ultimate comfort and satisfaction.?

Contact [Cool Techies](#) today! Let our experts help you create a comfortable, efficient, and healthy environment in your Houston or Katy area home.

How does attic insulation impact HVAC system performance??

[Attic insulation](#) impacts HVAC system performance by slowing the transfer of heat between spaces. Additionally, it blocks the flow of air. Trapped air creates heat.?

What does air flow testing mean??

Airflow testing includes measuring the movement of air through an HVAC product and overall performance.?

How does ductwork affect my HVAC system performance??

Hot, leaky [ducts](#) can increase costs to your heating and cooling bills. This is easily prevented by having your [ducts](#) sealed and insulated your ducts.?

Does poor HVAC airflow matter??

Poor HVAC performance airflow greatly reduces efficiency and overall performance. Your system will have to work harder in order to heat or cool, which in turn puts a strain on system parts, shortens longevity, heightens bills and makes it hard to stay comfortable.
